

Spark Signs & Graphics - Boosting Business

Spark Navigates Longwood at Oakmont Campus

We recently updated wayfinding (directional) signage for [Longwood at Oakmont](#), a continued-care Pittsburgh retirement community. Longwood's challenge was to have a system that eased navigation through their beautiful community. We were part of the solution as we fabricated and installed over 100 functional wayfinding, parking, and informational post and panel signs to identify and direct traffic to specific buildings. Check out our full [blog](#) on this project. And to see more photos, view our Longwood at Oakmont album on [Flickr!](#)

And other work from September.

Integrated Periodontics - Window Graphics

Window graphics are a great way to enhance a company's brand. We did just that for [Integrated Periodontics](#) new office in Warrendale. We used 3M dusted crystal vinyl and applied it to the transom window above their check-in area. The outcome: the appearance of the graphic looks like it was actually etched into the glass. This allowed for high impact branding within the office.

Mars Scuba - Building Signs & Window Graphics

Yes, there is Scuba in Mars, PA. [Mars Scuba](#) opened this past summer and has since become the go-to place to receive scuba certification in the Pittsburgh area. We utilized the Mars Scuba logo and fashioned this cool shaped sign that was placed on the front of their building. If you're planning a trip and need to obtain your scuba certification, give Mars Scuba a call.

Cool Springs Sports Complex Signage

Check out the cool work we did at the [Cool Springs Sports Complex](#). We brought the windows of two garage doors to life with dusted crystal vinyl versions of the Cool Springs logo. We also updated several sponsor sign areas with new signage. If you're into sports - adults and kids alike - check out Cool Springs.
